**MANAGER'S COMMENTS**

July started well for the KLCI as it hit a new all-time high of 1594.74 points on 8 July on the back of the Government's launch of the Strategic Reform Initiatives. However, market sentiment turned negative shortly as investors became concerned about the European debt problem. In addition, market sentiment was weighed down by uncertainties on the ability of US lawmakers to reach an agreement to raise US' debt ceiling and cut the federal deficit.

For the month, the FBM KLCI fell 30 points or 1.9% to close at 1,549 points. The broader index FBM EMAS dropped 1.5% to 10,683 points and the FBM Small Cap index declined 1.7% to 12,511 points. Among regional bourses, Thailand and Indonesia posted substantial gains whilst India and China declined.

On the local corporate front, Bumi Armada made its debut on Bursa on a strong note. Meanwhile, corporate exercises were still in vogue with Kencana Petroleum and SapuraCrest announcing their intention to merge to create one of the Malaysia's largest integrated oil and gas service providers while CI Holdings announced it is selling Permais Sdn Bhd to Japan's Asahi Group Holdings Ltd for RM820m.

Scout's NAV posted a loss of 0.2%, underperforming its benchmark's, FBM Fledgling Index increase of 0.3%. The performance was mainly dragged by its holdings in Faber and Help. This was mitigated by the positive performance from CI Holdings and Kumpulan Fima and QSR-WB.

Based on the fund's portfolio returns as at 15 July 2011, the Volatility Factor (VF) for this fund is 13.0 and is classified as "Moderate". (source: Lipper) "Moderate" includes funds with VF that are above 10.8 but not more than 14.2 (source: Lipper). The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC. The VC referred to at least 30 June 2011 which is calculated once every six months and is valid until its next calculation date, i.e. 31 December 2011.
